NEXT GENERATION

MINI EXCAVATORS

New Cat® 7-10 tonne Next Generation Mini Excavators have arrived, with an expanded range including the 307.5, 308CR, 309CR High Flow and 310.

NEXT GEN PERFORMANCE

- 20%* greater performance with:
- Up to 65%* improved lift capacity
 - 25%* improved swing torque
 - Best in class multi-function capability
 - Dedicated auxiliary pump (309CR High Flow)

TECHNOLOGY

- Stick steer and cruise control
- Adjustable hydraulic response
- Smartphone connectivity
- Bluetooth-enabled Keyless start

COMFORT

- Sealed and pressurised cab
- Climate control
- Joystick auxiliary and boom swing control
- Air-ride suspension seat with heater

FEATURES

- Up to 50 programmable operator codes
- LCD colour monitor with automotive-style jog-dial
- Integrated rear-camera

NEXT GENERATION

MINI EXCAVATORS

The range of Cat 7-10 tonne mini excavators are packed with Next Generation technology and all-new features.

STICK STEER & CRUISE CONTROL

A new mode of travel! Switch from the traditional travel levers to stick steer at the press of a button. Direct your left-hand joystick in your desired direction and the machine responds. Instantly switch back to dig mode using the same button.

OPERATOR COMFORT

The air-ride suspension seat with built-in heater promotes operator comfort. The sealed and pressurised cab with climate control keeps heat, dust and noise out. More thoughtful touches such as the fully foldable front window storage and no added foot pedals keep your operator working in comfort and at peak capacity.

KEYLESS START

All machines in the 7-10 tonne range come with Bluetooth-enabled keyless start. Operators can use the key to enable push-to-start instantly, or even leave the key at home and use up to 50 programmable start codes.

LCD COLOUR MONITOR

The LCD colour monitor on the Next Generation range is highly customisable. The operator can adjust the machine's hydraulic response, select attachments, modify auxiliary flow, engage the rear camera, change the temperature, play music, take smartphone calls and more.

ADJUSTABLE HYDRAULICS & OPERATOR MODES

New electronic controls enable the speed and aggressiveness of the machine's response to be varied. This makes delicate work such as lifting and placing objects safer and more accurate.

PLUS A WHOLE LOT MORE
